

Release of PLM-202-SUB

Purpose

The initial release of PLM-202-SUB detergent for use in submersible PostProcess machines (DEMI 200, DEMI 400, DEMI 800) with FDM support material as a replacement for PG2. PLM-202-SUB will be available on March 31, 2020.

Hazard Change

There is no change in hazard category for PLM-202-SUB in comparison to PG2.

Reason for Change

Through the continuous improvement process, PG2 has been updated to increase a competitive advantage over direct competitors.

Explanation of Naming

PLM-202-SUB

Material Type (Polymer) Technology (200 = FDM) Process Type (Submersion)

Testing

Testing (right) shows the continuous improvement solution, PLM-202-SUB, provides a dramatic reduction of support removal cycle time in comparison with the original version.
