

# DEMI X 520

## for Dental Resin Cleaning

### When Productivity and Safety Matter Most...

Are you spending over 30 minutes daily on manual resin cleaning?  
Looking to reduce IPA use in your lab?  
Want to free up technicians for more valuable tasks?

Introducing **DEMI X 520 for Dental Resin Cleaning!** Revolutionize your workflow with adjustable processes, minimize part damage risks, and ensure safe, optimal outcomes.

### Why Choose the DEMI X 520 for Dental Resin Removal?

- Eliminate cross-contamination between resins
- Simplify your workflow
- Ensure consistent results with error-free machines
- Allocate high-value labor to high-priority tasks
- Reduce IPA use by 95%
- Biomedical certified for safety
- Clean different resins in the same batch
- Grow your business without increasing headcount
- Optimize production with 40,000 parts cleaned per solvent fill

### Say goodbye to manual errors

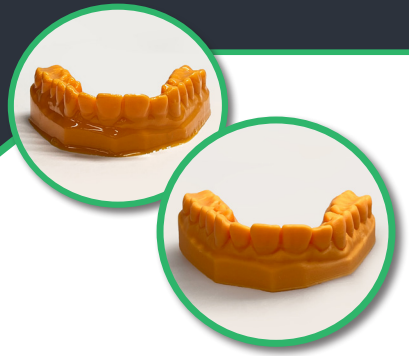

Customize your workflows with embedded software, registering recipes based on process, batch size, or resin. Tailor processing parameters such as time, temperature, and agitation for your specific needs. With programmable automatic warm-up, your unit is always ready when you need it, ensuring seamless, efficient, and error-free operations.

### Empower your team for value-added tasks

Minimize human intervention with minimal operator time required. Simply load parts, close the door, and press play! Plus, automatic lift reduces the risk of musculoskeletal disorders.

# DEMI X 520

## for Dental Resin Cleaning

### Effortlessly handle large batchess

As your 3D production grows, so do cleaning challenges. The DEMI X 520 handles thousands of parts in batches, processing up to 150 parts in under 10 minutes. Axial Flow Technology ensures uniform chemistry exposure for flawless finishes, while specific resin removal fixtures optimize processing regardless of build platform placement.

### Ready to ditch alcohol (IPA)?

Our patented PLM-403-SUB is solvent ISO 10993-1 compliant, and is formulated to handle up to 40,000 parts before saturation. It's safe, environmentally friendly, and performs exceptionally, offering a superior alternative to traditional solvents like IPA, ethanol, or acetone.

**Enhanced safety!** The PostProcess DEMI X 520 eliminates tedious manual cleaning and hazardous solvent use, significantly improving working conditions and environmental impact compared to traditional methods.

### Seeing is Believing... Hear from Our Customers!

“...allows us to quickly & efficiently clean up to **50 models in 5 minutes** with minimal handling.”

“...streamline our processes and help us upkeep the **high product quality standards** we are nationally recognized for.”

“...improvement to our **production workflow** was immediately evident.”
